MCQ Practice — Chapter 13

50	20	20	10
Total Questions	Easy	Medium	Hard

Topics: Markdown Basics, Headings, Lists, Code Blocks, Links, Images, Emphasis, AIDD Layers, Verification Framework

Print karte waqt answers automatically show honge. Screen par "Show Answer" button dabao.

Section 1: Markdown Basics & Why It Matters

Question 1 **Easy**

Markdown chapter 13 mein kya hai?

A) Sirf ek formatting tool

B) Programming language

C) Specification language jo AI agents ko batata hai kya build karna hai — Intent Layer

D) Database query language

Correct Answer: C
Markdown = Intent Layer in AIDD. Sirf formatting nahi — specification language hai jo AI ko guide karti hai.

Question 2 **Easy**

Markdown kab aur kisne banaya?

A) 2000, Bill Gates

B) 2004, John Gruber

C) 2010, GitHub

D) 2014, CommonMark

Correct Answer: B
Markdown 2004 mein John Gruber ne banaya. CommonMark 2014 mein formal specification bana.

Question 3 **Easy**

GFM ka full form kya hai?

A) General Formatting Mode

B) GitHub Flavored Markdown

C) Global File Management

D) Generative Framework Model

Correct Answer: B
GFM = GitHub Flavored Markdown. CommonMark extend karta hai tables, task lists, aur strikethrough se.

Question 4 **Easy**

Markdown file ki extension kya hoti hai?

A) .txt

B) .doc

C) .md

D) .html

Correct Answer: C
Markdown files .md extension se save hoti hain.

Question 5 **Medium**

AIDD mein Layer 1 (Intent Layer) par kaun kaam karta hai?

A) AI model

B) Database

C) AAP — developer ya user

D) Operating System

Correct Answer: C
Layer 1 (Intent) = Aap. Layer 2 (Reasoning) = AI. Layer 3 (Implementation) = AI. Aap spec likhte ho — aap final authority ho.

Question 6 **Medium**

Structured text ka kya faida hai unstructured text se AI ke liye?

A) File size choti hoti hai

B) AI guessing karta hai correctly

C) Ambiguity remove hoti hai — AI better output deta hai

D) Code automatically generate hota hai

Correct Answer: C
"Same information, dramatically different output. Structure removes ambiguity." — Chapter 13 ka key quote.

Question 7 **Medium**

AI Verification ka 4-step framework mein step 2 kya hai?

A) Test specific claims khud

B) AI se reasoning explain karwao — "Why is this correct?"

C) Cross-reference karo

D) Apni knowledge se compare karo

Correct Answer: B
Step 1: Check against knowledge. Step 2: Ask AI to explain reasoning. Step 3: Test claims. Step 4: Cross-reference.

Question 8 **Easy**

VS Code mein Markdown preview kaise dekhtay hain?

A) Ctrl+P

B) Ctrl+Shift+V

C) Ctrl+Alt+M

D) F5

Correct Answer: B
VS Code mein Ctrl+Shift+V (Windows) ya Cmd+Shift+V (Mac) se live markdown preview milta hai.

Question 9 **Medium**

Markdown headings technically AI ke liye kya kaam karte hain?

A) Font size badhaate hain

B) Attention cues ka kaam karte hain — AI ko batate hain section kahan hai

C) Code execute karte hain

D) Links create karte hain

Correct Answer: B
Markdown headings = attention cues. AI token processing mein "## Features" dekh ke samajhta hai features yahan hain.

Question 10 **Hard**

AIDD mein specification ka rule kya hai?

A) Implementation spec ko override kar sakti hai

B) Spec optional hai

C) Implementation must match spec — spec is the design authority

D) AI khud spec banata hai

Correct Answer: C
Spec = design authority. Implementation spec se match karna chahiye — ulta nahi. Aap specification ke final authority ho.

Section 2: Headings — Document Hierarchy

Question 11 **Easy**

Document title ke liye kaunsa heading level use karte hain?

A) ## (Level 2)

B) # (Level 1)

C) ### (Level 3)

D) #### (Level 4)

Correct Answer: B
(Level 1) sirf document title ke liye — SIRF EK baar use hona chahiye poore document mein.

Question 12 **Easy**

Heading likhne ka sahi tarika kaunsa hai?

A) `#Heading`

B) `# Heading`

C) `##Heading`

D) `Heading#`

Correct Answer: B
ke baad space zaroori hai. `#Heading` render nahi hoga correctly.

Question 13 **Easy**

Main sections (Problem, Features, Installation) ke liye kaunsa level use karein?

A) # (Level 1)

B) ## (Level 2)

C) ### (Level 3)

D) #### (Level 4)

Correct Answer: B
(Level 2) main sections ke liye. ### (Level 3) subsections ke liye.

Question 14 **Medium**

Yeh heading structure mein kya galat hai?

`# My App → ### Installation Steps`

A) Level 1 galat hai

B) Level 2 skip kiya gaya — seedha Level 1 se Level 3

C) Space missing hai

D) Kuch galat nahi

Correct Answer: B
Level 1 se seedha Level 3 — Level 2 skip kiya gaya. Hierarchy toot gayi. Sahi: # → ## → ###

Question 15 **Medium**

Ek document mein kitni baar # (Level 1) use karna chahiye?

A) Jitni baar chahein

B) 2-3 baar

C) Sirf EK baar (document title)

D) Har section mein

Correct Answer: C
Level 1 sirf ONCE — document title ke liye. Baaki sab ## ya neeche se start karein.

Question 16 **Medium**

Heading levels 5-6 ke baare mein kya advice di gayi hai?

A) Inhe regularly use karo

B) Advanced features ke liye best hain

C) Avoid karo — agar zarurat pad rahi hai to document too complex hai

D) Sirf mobile ke liye hain

Correct Answer: C
Level 5-6 avoid karo specs mein. Agar zarurat hai to document structure too complex hai —

simplify karo.

Question 17 **Hard**

Heading hierarchy skip karne se kya hota hai?

A) Sirf visual issue hota hai

B) AI ka logical document map toot jaata hai aur screen reader accessibility fail hoti hai

C) File size badh jaati hai

D) Code generate nahi hota

Correct Answer: B
Skipping levels: AI ka logical map tootta hai + screen reader accessibility break hoti hai. Dono problems hote hain.

Section 3: Lists — Organizing Ideas

Question 18 **Easy**

App features list karne ke liye kaunsa list type use karein?

A) Ordered list (1. 2. 3.)

B) Unordered list (- - -)

C) Heading list

D) Table

Correct Answer: B
Features ka order matter nahi karta — unordered list use karo. Ordered sirf jab sequence zaroori

ho.

Question 19 **Easy**

Installation steps ke liye kaunsa list type use karein?

A) Unordered list

B) Ordered list

C) Nested list

D) Koi bhi chalega

Correct Answer: B
Installation steps ka sequence matter karta hai — ordered list zaroori hai. Python pehle install hoga, phir packages.

Question 20 **Easy**

Unordered list ke liye kaunse 3 symbols use ho sakte hain?

A) >, >>, >>>

B) -, *, +

C) #, ##, ###

D) 1., 2., 3.

Correct Answer: B
-, * ya + — teeno unordered list banate hain. Ek consistent style choose karo poore document mein.

Question 21 **Easy**

List item ka sahi syntax kaunsa hai?

A) `-Item without space`

B) `- Item with space`

C) `Item-`

D) `*Item*`

Correct Answer: B
- ke baad space zaroori hai. Bina space ke render nahi hoga correctly.

Question 22 **Medium**

List type choose karne ka decision rule kya hai?

A) "Is it important?" — Haan = Ordered

B) "Does order matter?" — Haan = Ordered, Nahi = Unordered

C) "Is it code?" — Haan = Ordered

D) Hamesha ordered use karo

Correct Answer: B
"Does order matter?" — Yahi decision rule hai. Features = nahi matter karta = unordered. Steps = matter karta hai = ordered.

Question 23 **Medium**

Nested list mein indent kaise dete hain?

A) Tab key se

B) 2 spaces se indent

C) Colon se

D) Arrow se

Correct Answer: B
Nested list ke liye 2 spaces indent karo parent item se aage.

Question 24 **Medium**

AI unordered list "Features" ke neeche dekh ke kya samajhta hai?

A) Ek sequential workflow

B) Parallel capabilities — modular architecture mein develop ho sakti hain

C) Database schema

D) Test cases

Correct Answer: B
Unordered = parallel capabilities = modular architecture. Ordered = sequential = dependencies communicate karta hai.

Question 25 **Hard**

Ordered list numbering ke baare mein AI-native development mein kya warning hai?

A) Always Roman numerals use karo

B) Hamesha correct sequential numbers likho kyunki AI raw source file padhta hai — all "1." markers confuse kar sakte hain

C) Numbering optional hai

D) Sirf even numbers use karo

Correct Answer: B
AI raw .md file padhta hai, rendered HTML nahi. All "1." markers older AI models confuse kar sakte hain. Correct 1. 2. 3. use karo.

Section 4: Code Blocks — Examples Dikhana

Question 26 **Easy**

Fenced code block banana ke liye kya use karte hain?

A) Single quotes

B) Triple backticks (```)

C) Double quotes

D) Angle brackets

Correct Answer: B
Fenced code block = triple backticks (```) se start aur end hota hai.

Question 27 **Easy**

Inline code ke liye kya use karte hain?

A) Triple backticks

B) Single backtick (`)

C) Double asterisk

D) Underscore

Correct Answer: B
Inline code = single backtick. Example: `` `pip install requests` ``

Question 28 **Easy**

Program ka expected output dikhane ke liye kaunsa language tag use karein?

A) python

B) bash

C) text

D) output

Correct Answer: C
Expected output ke liye `text` tag. Python code ke liye `python`. Terminal commands ke liye `bash`.

Question 29 **Medium**

Inline code kab use karein?

A) Multiple lines ke liye

B) Program output dikhane ke liye

C) Sentence mein variable names, file names, short commands ke liye

D) Error messages ke liye

Correct Answer: C
Inline code = short references in sentences. Variable names, file names (app.py), commands (pip install). Multi-line ke liye fenced use karo.

Question 30 **Medium**

Language tag nahi dene se kya hota hai?

A) Code render nahi hota

B) AI appropriate syntax rules apply nahi karta — ambiguity hoti hai

C) File size badh jaati hai

D) Kuch nahi hota

Correct Answer: B
Language tag AI ko batata hai: kaunsi language, kaunse standards, kaunse syntax rules. Bina tag ke AI guess karta hai.

Question 31 **Medium**

Agar Python code ko "text" language tag do to kya hoga?

A) Code faster run hoga

B) AI PEP 8 rules ignore kar dega

C) Syntax highlighting behtar hogi

D) Code automatically execute hoga

Correct Answer: B
"If you tag Python code as text, the AI may ignore syntax rules and coding standards (like PEP 8)." — Chapter 13 warning.

Question 32 **Hard**

"Specification by Example" concept kya kehta hai code blocks ke baare mein?

A) Code blocks sirf decoration ke liye hain

B) Code blocks act as executable documentation AND acceptance tests — AI output match kare to implementation correct hai

C) Code blocks slow karte hain rendering

D) Code blocks optional hain

Correct Answer: B
Specification by Example: Code block = executable documentation + acceptance test. AI ka output block se match kare = implementation correct!

Question 33 **Hard**

"Semantic Anchoring" ka matlab kya hai code blocks ke context mein?

A) Code ko HTML mein embed karna

B) Code blocks AI ko prevent karte hain hallucinated command variations se

C) Database anchoring technique

D) SEO optimization

Correct Answer: B
Semantic Anchoring = code blocks AI ko exact command ya output se "anchor" karte hain — AI apni marzi se variation nahi de sakta.

Section 5: Links, Images & Emphasis

Question 34 **Easy**

Markdown mein link ka sahi syntax kya hai?

A) `(link text)[url]`

B) `[link text](url)`

C) `{link text}(url)`

D) `<link text>url</link>`

Correct Answer: B
[link text](url) — square brackets mein display text, round brackets mein URL.

Question 35 **Easy**

Image aur link mein kya fark hai syntax mein?

A) Image mein double brackets

B) Image mein `!` prefix hota hai — `![alt](url)`

C) Image mein quotes use hoti hain

D) Koi fark nahi

Correct Answer: B
Image = `![alt text](url)` . Link = `[link text](url)` . ! prefix image ko link se alag karta hai.

Question 36 **Easy**

Bold text kaise likhte hain?

A) `*text*`

B) `**text**`

C) `__text`

D) `###text###`

Correct Answer: B
Bold = `**text**` ya `__text__` . Italic = `*text*` . Bold+Italic = `***text***` .

Question 37 **Medium**

Link text kaise hona chahiye?

A) "Click here" ya "link" likhna theek hai

B) Descriptive — destination ka purpose bataye

C) URL seedha paste karo

D) Numbers use karo

Correct Answer: B
Descriptive link text likho. "Click here" avoid karo. Good: "Install Python 3.9" Bad: "Click here to install".

Question 38 **Medium**

Agar image ke sath `!` prefix nahi diya to kya hoga?

A) Image badi ho jaayegi

B) Image render nahi hogi — sirf text link banega

C) Image automatically resize hogi

D) Alt text show hoga

Correct Answer: B
! prefix ke bina [alt](url) sirf ek regular link banega — image render nahi hogi. ! image ko distinguish karta hai.

Question 39 **Medium**

Bold emphasis kab use karni chahiye?

A) Har important word ke liye

B) Sirf truly critical requirements aur warnings ke liye

C) Headings ke liye

D) Code names ke liye

Correct Answer: B
Bold sirf truly critical items ke liye. Zyada bold = impact khatam. Italic = optional items ke liye.

Question 40 **Hard**

URL mein spaces ka kya problem hai?

A) URL lambi ho jaati hai

B) Spaces wali URL break ho jaati hai — `%20` ya no-space use karo

C) Koi problem nahi

D) Sirf mobile pe problem hoti hai

Correct Answer: B
[text](my url) — space wali URL break ho jaati hai. Fix: [text](my%20url) ya spaces remove karo.

Section 6: Mixed Revision Questions

Question 41 **Medium**

Task Tracker App spec mein "Problem" section kaise likhein?

A) Ordered list mein

B) Unordered list mein

C) Plain paragraph mein

D) Code block mein

Correct Answer: C
Problem section = paragraph. Features = unordered list. Installation = ordered list. Output = code block.

Question 42 **Medium**

Nested lists kab use karein headings ki jagah?

A) Hamesha nested lists use karo

B) Jab section ke andar details ho — 10+ Level 3 headings se nested lists behtar hain

C) Sirf code ke liye

D) Jab document print karna ho

Correct Answer: B
Rule: Headings major sections ke liye, nested lists section ke andar details ke liye. 10+ sub-headings = too complex = nested lists use karo.

Question 43 **Easy**

GFM (GitHub Flavored Markdown) CommonMark mein kya extra add karta hai?

A) Images aur links

B) Tables, task lists (`- [ ]`), strikethrough (`~~text~~`)

C) Code blocks

D) Headings

Correct Answer: B
GFM extends CommonMark with: tables, task lists (- [ ]), aur strikethrough (~~text~~).

Question 44 **Medium**

Beginners ke liye markdown likhne ka best free tool kaunsa hai?

A) Microsoft Word

B) Notepad

C) StackEdit (stackedit.io)

D) Adobe Acrobat

Correct Answer: C
StackEdit = browser-based, install nahi, split-pane live preview — beginners ke liye best.

Question 45 **Hard**

Ek complete spec mein in elements ka sahi use kya hai?

A) Sab kuch code blocks mein likho

B) # title, ## sections, ### subsections, - features, 1. steps, ```text expected output, `inline` commands

C) Sirf headings kaafi hain

D) Lists aur code blocks mix nahi karne chahiye

Correct Answer: B
Complete spec: H1 title, H2 sections, H3 subsections, unordered features, ordered steps, fenced output, inline commands — sab milke kaam karte hain.

Question 46 **Hard**

Chapter 13 ka core philosophy kya hai?

A) Markdown ki har feature memorize karo

B) "Collaborate with AI, not memorize every markdown feature"

C) Markdown se apps directly build karo

D) HTML better hai markdown se

Correct Answer: B
"This chapter teaches you to collaborate with AI, not memorize every markdown feature." — Chapter 13 ka opening philosophy.

Question 47 **Medium**

Closing backticks bhool jaane se kya hota hai?

A) Kuch nahi hota

B) Sab subsequent text code block mein chala jaata hai

C) Error message aata hai

D) Code block delete ho jaata hai

Correct Answer: B
Closing ``` bhoolne se baaki sab content code block ka hissa ban jaata hai — document completely break ho jaata hai.

Question 48 **Easy**

Italic text kaise likhte hain?

A) `**text**`

B) `*text*` ya `_text_`

C) `***text***`

D) `~~text~~`

Correct Answer: B
Italic = *text* ya _text_. Bold = **text**. Strikethrough = ~~text~~ (GFM only).

Question 49 **Hard**

AI ne kaha "Your spec is very clear" — aap kaise verify karein?

A) AI ka jawab accept karo

B) AI ko spec implement karwao — agar generated code aapka intent match kare to spec actually clear thi

C) Dobarah likhno

D) Dost ko dikhao

Correct Answer: B
Verification Framework tip: AI ko spec implement karwao. "If generated code doesn't match your intent, the spec wasn't actually clear."

Question 50 **Hard**

AIDD mein "Intent Layer" ka significance kya hai?

A) AI ka kaam hai intent layer

B) Developer yahan markdown spec likhta hai — ye design authority hai, implementation is se match karni chahiye, naki ulti

C) Database layer hai

D) Testing layer hai

Correct Answer: B
Intent Layer = aap yahan markdown spec likhte ho. Ye authoritative definition hai — implementation MUST match spec. Aap final approval authority ho.
